SUMMARY

Site Reliability Engineer with 2.6 years of experience managing mission-critical production systems across AWS and Azure environments. Experienced in Infrastructure as Code using Terraform, Kubernetes orchestration, CI/CD automation with GitHub Actions and Jenkins, and observability using Grafana, Loki, Prometheus, and CloudWatch. Proven expertise in incident response, production support, infrastructure automation, and improving application reliability through monitoring, automation, and operational excellence.

EXPERIENCE - 2 YEARS 6 MONTHS

Operations Support Engineers/SRE

Contango Services Private Limited

Bengaluru/Remote

Feb 2024 – Present

- Implemented centralized logging and monitoring solutions using Grafana, Loki, and Promtail, improving observability and incident response.
- Automated operational tasks by integrating PowerShell scripting with Jenkins, enhancing system efficiency and reducing manual intervention.
- Highly skilled in monitoring and managing Windows and Linux servers remotely.
- Experienced in incident management, ensuring issues are resolved promptly while maintaining SLA, SLO, and SLI metrics.
- Participate in on-call rotation to ensure coverage for planned/unplanned events
- Participated in Agile Sprints, contributing to task planning, backlog refinement, and delivering high-quality solutions.
- Participated in incident management by troubleshooting issues, conducting root cause analysis, and ensuring long-term fixes to prevent recurrence by conducting post-mortems/Post incident reviews.
- Monitoring & performing health checks using monitoring tools like PRTG, Grafana and Jenkins.
- Proficient in Kusto Query Language (KQL) to work with log analytics data.
- Familiar with troubleshooting and managing containerized environments using Docker and Kubernetes.
- Led and facilitated fortnightly retrospectives to identify areas of improvement, address bottlenecks, and foster a culture of continuous enhancement.
- Managed production AWS infrastructure using EC2, IAM, VPC, S3, Route 53, RDS, and CloudWatch to support highly available enterprise applications ensuring scalability, reliability, and security.
- Resolved critical infrastructure issues, ensuring high availability and security for business-critical applications.
- Developed reusable Terraform modules to provision cloud infrastructure, enabling consistent and repeatable deployments across multiple environments.
- Leveraged extensive Linux troubleshooting knowledge to swiftly diagnose and resolve issues, ensuring uninterrupted service delivery.
- Own all operational aspects of running web services including automation, monitoring and alerting, reliability and performance
- Experienced in troubleshooting any data issues having mismatch eligibility raised by users using Unix commands and Database (MySQL) queries.
- Have understanding of common network protocols and services (DNS, HTTP(S), SSH, FTP).

EDUCATION

JSS Academy of Technical Education, Noida

Bachelor of Technology

- Graduated with an aggregate of 75.30%.

ACHIEVEMENTS

- Recognized with **Star of the Quarter Award** for consistently demonstrating outstanding dedication, initiative, and excellence.
- Resolved the highest number of incidents over the last three quarters, consistently exceeding performance benchmarks.

SKILLS

Monitoring and Logging: PRTG, AWS CloudWatch, Grafana, Loki, Promtail

Database Administration: MySQL, SQL Server, Oracle SQL Developer

Tools and Platforms: Linux, AWS, Azure, Jenkins, Terraform, Docker, Kubernetes, Service Now, Confluence

Programming Languages: Shell Scripting, PowerShell
